

Behlul

■■	■■
first_name	Behlul
last_name	Koksoya
degree	3.0
location	Toronto, Ontario, Canada
person_summary	Highly skilled software developer with a proven track record of delivering high-quality solutions across diverse industries, including IT, marketing, and banking. Proficient in both backend and frontend development using various programming languages and frameworks, including .NET Core and React. Demonstrated ability to solve complex problems and debug software efficiently and accurately, with a strong focus on scalability. Bachelor's Degree in Computer Engineering and solid knowledge of computer science and engineering principles.
current_position_summary	Back End Developer at The Canadian Press for Industry None for 1 years 0 months. The Canadian Press description: Designed and implemented a data pipeline that listens to a messaging queue, processes TV transcripts based on program schedules, and publishes them to a content delivery system used by external clients. Developed a RESTful API delivering content in MRSS format to various clients, ensuring standardized, scalable, and real-time media distribution. Migrated and refactored legacy systems to AWS Cloud, simplifying backend infrastructure while improving performance, maintainability, and scalability. Built a translation tool utilizing Google Translate API and DeepL API to automate multilingual content conversion, improving editorial workflow efficiency. Utilized technologies suc
	h as Python, Flask, AWS Lambda, DynamoDB, MongoDB, API Gateway, S3, and Docker to develop scalable, cloud-native backend solutions. In total at The Canadian Press for 1 years 0 months.
