

Dimple

■■	■■
first_name	Dimple
last_name	Prajapati
degree	3.0
location	Pune, Maharashtra, India
person_summary	<p>■ Backend Developer 10+ Years of Building Scalable, Secure, and Performant Systems I architect and build backend systems that power real-world applications - fast, reliable, and built to scale. With over a decade of experience in the Microsoft ecosystem, I've led the development of enterprise-grade platforms, APIs, and cloud-native services using the .NET stack. Whether it's optimizing complex business logic, designing resilient microservices, or streamlining deployment pipelines, I focus on solutions that are clean, maintainable, and impactful. ■ What I bring: - Deep expertise in C#, ASP.NET Core, Entity Framework - Building RESTful APIs and microservices architectures - SQL Server, MySQL, Redis, and NoSQL solutions - Cloud-native development (AWS, Docker, Kubernetes) - Proven success</p>
	<p>in designing microservices & distributed systems - Full stack capabilities: JavaScript/TypeScript, Angular, React - Scalable architecture, performance tuning, and security best practices - Experience working across fintech, SaaS, and enterprise environments I'm passionate about software development not just as a craft - but as a critical force behind digital transformation. I love solving tough problems, mentoring teams, and pushing for continuous improvement in code and process.</p>
current_position_summary	<p>Back End Developer at IBM for Industry None for 3 years 10 months. IBM description: - Developed and maintained enterprise-level applications using .NET Framework, .NET Core, C#, and Microservices Architecture, enabling scalable development across multiple business domains. - Implemented responsive user interfaces using Ember.js, jQuery, HTML5, and CSS3, ensuring cross-browser compatibility and a consistent user experience. - Built and consumed RESTful Web APIs, integrating with external and internal systems using secure communication protocols and best practices. - Optimized database performance with indexing, query refactoring, and schema redesign, cutting query latency by 60%. - Developed billing and subscription microservices, resulting in a 20% increase in payment success. - Migr</p>
	<p>ated legacy monolith to microservices, improving velocity by 3x and reducing deployment risk. - Deployed and maintained applications on AWS using EC2, S3, RDS, and CloudWatch. In total at IBM for 3 years 10 months.</p>
