Craig

■■	■■
first_name	Craig
last_name	Sakimoto
degree	3.0
location	Sequim, Washington, United States
person_summary	Senior Software Engineer with 10+ years of experience delivering robust, scalable full-stack solutions in high-stakes environments. Proven track record designing and developing mission-critical applications using Ruby on Rails, Golang, Angular, and modern APIs. Strong expertise in service-oriented architecture, relational database design, and test-driven development. Adept at collaborating cross-functionally with product, design, and engineering teams to build user-focused features that enhance productivity and experience. Passionate about building flexible, efficient systems that scale with business needs. Skilled in leading technical vision, end-to-end delivery, and iterative experimentation. Fast learner with adaptability to new languages and frameworks.
current_position_summary	Lead Backend Engineer at Corsair for Industry None for 4 years 9 months. Corsair description: Lead Backend Developer – Esports Coaching Platform – Full-time As Lead Backend Engineer for Corsair's Esports Coaching Platform, I played a key role in redesigning the purchase flow, including coach management, discount application, and subscription processes, resulting in a more intuitive and efficient user experience. I led the backend development efforts and orchestrated the implementation of new features, ensuring seamless integration with the platform. Original site has been replaced, by a lighter version as we have shut this service down. - Architected and developed scalable APIs and backend systems for an Esports coaching platform using Ruby on Rails and Golang, supporting thousands of
	concurrent users. - Designed and implemented service-oriented architecture to enable modular, maintainable code and efficient data processing. - Led redesign of purchase flow, integrating complex discount logic, subscription management, and SSO (SAP Gigya). - Collaborated closely with product managers and designers to deliver user-focused features and optimize agent and customer workflows. - Automated reporting and job processes to improve operational efficiency and reduce manual work. - Oversaw CI/CD processes, security reviews (HackerOne findings remediation), and production deployments. In total at Corsair for 4 years 9 months.
