Peijian Ju

New Brunswick, Canada

Summary

I have many roles, a husband with a lovely wife, a software developer, and the leader of a University club. But above all, I consider myself a learner. Learn to treat people respectfully, enjoy life, and use new technologies to make life easier. I am currently a software developer / DevOp at Sonrai Security. My work involves various aspects of a product such as Kubernetes, backend API development, and automated tests.
